

AGRONETRA — Crop Health Analysis Report

Metric / Category	Diagnostic Field Value
Target Botanical Identification	Bell Pepper - Bacterial Spot
Neural Network Confidence Level	b'H\xe13B'%
Target Classification Category	Gardener
Diagnostic Evaluation Window	13-06-2026 22:38:42
Symptomatic Structural Description	Bacterial infection causing dark leaf and fruit spots.
Prescriptive Intervention Measures	Copper-based bactericides.
Long-term Preventative Measures	Use disease-free seeds and crop rotation.
Tactical Field Deployment Plan	Remove infected leaves; Apply recommended pesticide/fungicide; Monitor spread every 3 days; Consult agricultural expert if severe
Estimated Treatment Cost	INR 210.00
