

AGRONETRA — Crop Health Analysis Report

Metric / Category	Diagnostic Field Value
Target Botanical Identification	Apple - Black Rot
Neural Network Confidence Level	99.95%
Target Classification Category	Farmer
Diagnostic Evaluation Window	15-06-2026 10:10:15
Symptomatic Structural Description	Fungal disease causing fruit rot, leaf lesions, and branch cankers.
Prescriptive Intervention Measures	Use fungicides and prune dead wood cankers immediately.
Long-term Preventative Measures	Maintain rigorous orchard hygiene and ground clearance.
Tactical Field Deployment Plan	Remove infected leaves; Apply recommended pesticide/fungicide; Monitor spread every 3 days; Consult agricultural expert if severe
Estimated Treatment Cost	INR 15000.00
